EXECUTIVE PROFILE

10+ Years Enterprise IT & Operations

High-impact **Country Presales & Solutions Architecture Lead** with over **10+ years of enterprise experience** leading technical presales strategy, enterprise solution architecture, and mission-critical 24/7 IT operations. Proven 100% presales deal-to-delivery track record across multinational corporations, tier-1 banking institutions, regional decacorn superapps, and hyperscale data centers. Deeply specialized in the **Atlassian Cloud ecosystem** (Jira Service Management, Atlassian Cloud Enterprise migrations, relational JSM Assets/CMDB, Forge serverless automation) and **audit-ready Service Governance**. Uniquely bridges commercial presales acumen and high-precision SOW sizing with 4 years of hands-on 24/7 enterprise service desk operational command.

CORE COMPETENCIES & TECHNICAL ARCHITECTURE

Technical Presales & Bidding:	C-Level Discovery, RFP/RFI Defense, Precise SOW & Man-Day Sizing, Solution GAP Analysis, POC Demonstrations.	Enterprise ITSM (JSM):	Jira Service Management Cloud/DC, Multi-Tier SLAs, Dynamic Request Catalogs, Multi-Tenant Hierarchy, Approvals.
Service Governance & Compliance:	Major Incident Command, Root Cause Analysis (RCA), Change Advisory Board (CAB), UU PDP Compliance, SLA Audits.	Atlassian Cloud Migration:	Server/DC to Cloud Enterprise (JCMA), Zero-Downtime Cutover, ScriptRunner Groovy-to-REST Refactoring, Atlassian Guard.
Living CMDB & ITAM Architecture:	Relational JSM Assets Schema Design, Blast-Radius Incident Mapping, Device42 Hybrid Auto-Discovery Grid.	Automation & Integrations:	Atlassian Forge Apps, Cloudflare Serverless Workers, REST API Pipelines, SAP S/4HANA & SuccessFactors, Microsoft Sentinel.

PROFESSIONAL EXPERIENCE

Country Presales & Solutions Architecture Lead – Indonesia

2022 – Present

PT iZeno Teknologi Indonesia

Jakarta / Hybrid

Leading the Indonesia technical practice, driving country-level presales strategy, deal scoping, SOW man-day sizing, enterprise ITSM/CMDB architecture, and cloud cutover delivery for multinational clients.

- **Country-Level Presales & RFP Defense:** Directed technical presales solutioning and C-level discovery sessions across enterprise accounts; authored winning technical proposals, RFP/RFI responses, and high-accuracy SOW man-day estimations that secured multi-billion-IDR enterprise mandates.
- **Enterprise ITSM & Living CMDB Architecture:** Architected large-scale Jira Service Management (JSM) platforms, bespoke JSM Assets (CMDB) object schemas, multi-tier SLA matrices, and hierarchical approval workflows for regional decacorn superapps, tier-1 commercial banks, pan-Asian hyperscale data centers, and petrochemical groups.
- **Operational-Grade Cloud Migration:** Leveraged deep operational background to engineer zero-loss, zero-downtime migration pipelines from on-premises Jira Server/DC to Atlassian Cloud Enterprise, including a massive 345,000+ ticket migration and 50 man-days of ScriptRunner Groovy-to-REST Cloud modernization.
- **Enterprise Service Governance & Regulatory Compliance:** Designed audit-ready Change Advisory Board (CAB) workflows, regulatory PII data masking engines satisfying statutory Indonesian UU PDP privacy laws, and multi-calendar SLA frameworks that satisfied rigorous central banking audits.
- **Practice Mentorship & Technical Steering:** Guided cross-functional delivery consultants and engineering squads, maintaining implementation excellence, delivery methodology, and high-trust executive stakeholder alignment.

Service Governance

Service Desk Supervisor & Service Management Analyst

2018 – 2022

PT Aplikanusa Lintasarta (Enterprise ICT & Telco Backbone Provider)

Jakarta, Indonesia

Spearheaded 24/7 mission-critical IT & telecommunications operations serving tier-1 banking, enterprise telco backbones, and corporate clients. Directed front-line operational governance, major incident command, and multi-tier SLA compliance.

- **24/7 Operations Command & Team Leadership:** Directly supervised and mentored a front-line operational force of 8 Service Desk Analysts operating in a continuous 24/7/365 shift rotation, maintaining >98% enterprise client satisfaction and flawless contractual SLA compliance across mission-critical networks.
- **Major Incident Commander (P1/P2):** Served as primary Incident Commander during high-severity network outages, coordinating rapid cross-functional escalations between field engineering, network operations (NOC), third-party carriers, and enterprise client stakeholders to drastically minimize service downtime.
- **Problem Management & Deep RCA:** Spearheaded formal Problem Management frameworks and Root Cause Analysis (RCA) playbooks for unresolved and recurring incidents; facilitated Post-Incident Reviews (PIR) that reduced chronic infrastructure failure recurrence by 35%.
- **Operational KPI Benchmarking & Governance:** Formulated, monitored, and audited core operational metrics (First Contact Resolution / FCR, Mean Time to Detect / MTTD, MTTR), enforcing proactive SLA breach prevention protocols and executive reporting dashboards.
- **ITSM Tooling Optimization (ServiceDesk Plus):** Administered and re-engineered enterprise ITSM platform configurations (ManageEngine ServiceDesk Plus), redesigning approval chains, incident dispatch logic, and change control workflows to align with international enterprise service governance standards.

Network Operation Center (NOC) Support Analyst

2017 – 2018

PT Swadharma Duta Data (Financial & Banking IT Services)

Jakarta, Indonesia

Provided real-time 24/7 Tier-1 technical monitoring and incident containment for mission-critical core banking and inter-bank financial transaction networks.

- **24/7 Mission-Critical Financial Surveillance:** Executed continuous real-time surveillance across mission-critical banking infrastructure, ATM switching networks, and core financial transaction systems under strict contractual banking SLAs.
- **Rapid Incident Triage & Escalation:** Diagnosed link degradations and hardware faults in real time, executing rapid first-level containment and coordinating seamless handoffs with Tier-2 infrastructure and telecom provider engineers.
- **Knowledge Base & SOP Standardization:** Authored standard operating procedures (SOPs) and disaster recovery runbooks within the central banking NOC repository, accelerating shift onboarding and incident resolution velocity.

Enterprise Network Field Engineer

2015 – 2017

Sab'a System Solution (Vendor Partner for Indosat Ooredoo)

Greater Jakarta / On-Site

Spearheaded on-site deployment, physical installation, and commissioning of enterprise network infrastructure across corporate client sites for Indosat's B2B enterprise telecommunications division.

- **Enterprise On-Site Deployment:** Executed rack-and-stack installations, patch panel cabling, router/switch hardware commissioning, and CPE configuration across enterprise corporate client premises.
- **Site Survey & Physical Testing:** Conducted technical site surveys, physical layer loopback testing, signal attenuation verification, and link stability validations for high-bandwidth leased lines and enterprise MPLS WAN connectivity.
- **Cutover & Handover Management:** Coordinated cutover windows and user acceptance testing (UAT) directly with client IT managers and Indosat network operations, ensuring seamless handovers, zero schedule slippage, and formal acceptance reports (BAST).

SELECTED ENTERPRISE TRACK RECORD

100% Won via Presales & Delivered

CLIENT & PROJECT SCOPE	PRESALES & ARCHITECTURAL STRATEGY	BUSINESS OUTCOME & OPERATIONAL IMPACT
Regional Tech Decacorn Superapp Salesforce to JSM Cloud Migration	Led competitive presales discovery against legacy tools; authored SOW with phased sizing; architected Datahub ETL pipelines.	Migrated 345,000+ historical tickets with zero data loss; streamlined 205 legacy forms down to 47 dynamic JSM forms (~75% sprawl).
Pan-Asian Hyperscale Data Centers Mission-Critical ITSM & JSM Assets	Won international tender by defending live CMDB dependency mapping linking EUC/servers/networks to CAB change control.	Automated change collision prevention across 99.999% uptime Tier-3/Tier-4 hyperscale facilities; 100% audit-compliant records.
State-Owned Microfinance BUMN ITSM Portal & ScriptRunner PII Engine	Spearheaded technical bid addressing statutory Indonesian UU PDP data privacy laws via automated in-flight PII masking.	100% statutory PII data privacy compliance ; resolved nationwide branch SLA bottlenecks and orphaned account sprawl.
Leading Commercial Bank Core Banking ITSM & SAP Integration	Formulated unified architecture consolidating 5 ticketing silos; integrated SAP S/4HANA master data for dynamic CCB approvals.	Unified 5 disparate operational silos into single pane; achieved 100% central banking audit readiness .
Regional Automotive Mobility Giant Freshservice & Device42 Hybrid CMDB	Won tech refresh RFP via live proof-of-concept integrating Freshservice Enterprise with on-premise Device42 auto-discovery grid.	Continuous living CMDB tracking 4,000+ hardware and network nodes ; achieved ~35% Tier-1 ticket deflection via Freddy AI.

CERTIFICATIONS & CREDENTIALS**ITIL® 4 Specialist: Create, Deliver and Support (CDS)**

PeopleCert / AXELOS — Certified Advanced Practitioner in Value Streams & Service Integration

ITIL® 4 Foundation in IT Service Management

PeopleCert / AXELOS — Mastered Four Dimensions of Service Management & Service Value System (SVS)

EDUCATION**Bachelor of Computer Science (S1 Teknik Informatika)**
